DOBI EXHAUST HEADERS

DOBI has spent hours of testing time to design the most efficient exhaust headers for Monzas, Skyhawks, Starfires and Sunbirds. Each header was designed especially for each particular engine. DOBI has also incorporated the most advanced design techniques in header design. This insures that each DOBI header produces the greatest performance increase, also, increased fuel economy and helps let the engine run cooler. All of DOBI'S headers are made from heavy gauge header tubing. This insures that DOBI headers will last.

DOBI EXHAUST SYSTEMS

Without a doubt, there will be a noticeable improvement in the engine performance of your Monza, Starfire, Sunbird, and Skyhawk. As any performance minded enthusiast knows, original or standard equipment places a very restrictive and burdensome output upon your engine. The installation of a fully engineered exhaust system for your car, will almost completely eliminate back pressure. The performance of your engine is increased because the exhaust flow, gas and speed is drastically improved. The DOBI Exhaust System for your car will increase acceleration and at the same time improve gas mileage per gallon. The DOBI Exhaust System utilizes 16 gauge tubing, almost two times more protection than most other systems, and although the state of California has some of the most rigid automotive laws in the nation, the DOBI Exhaust System meets all California noise level requirements.
